Manufactured from high alloy steel, which offers high torque, durability, and abrasion resistance. Heat-treated alloy steel and hard chrome plating provide high strength and resistance, increasing work efficiency and safety. Ball-pointed design allows quick-turning and temporary tightening.

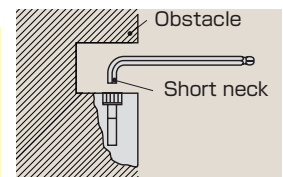

MASTER TOOL
Special alloy steel

For ball point type, it can be tilting until 30 degree

Short-neck part is very useful for using at a narrow place.

Ball point type

CAUTION

- Ball-point portion is made thinner. Do not apply excessive force when using ball-point type.
