# **SPECIAL FEATURES & BENEFITS**

#### PID with sleep mode

- ◆ Water supply PID adjustment: If the feedback pressure is higher than the set pressure, start the sleep detection to save more energy.
- ◆ After the sleep time delay, if the feedback pressure is still greater than the set pressure, the VSD enters into the sleep mode and slows down to the lower frequency
- ♦ When the feedback pressure reach to the wake up threshold pressure and the wake up detection time passes, it will start automatically

Simple PLC

◆ Multistage speed control for up to 16 stages. Frequency, time,

timer unit and direction for each stage can be set individually.

**Fixed-length control** 

◆ Use DI4/DI5 (DI4/DI5 = 44 ) to input speed pulse for real-time

◆ Target applications: Textile machine, cable drawing machine

length measurement. When the set length (set by FC.14) is

reached, it triggers the length reached signal, and the fixed-length

• Single cycle (After a single cycle it keeps running at final value)

◆ Target applications: Pump for HVAC, Water / Waste water

RUN

STOP

◆ PLC operation mode:

Continuous cycle

function is realized.

◆ No need for upper controller

◆ Target applications: Fan, ball mill, centrifuge

# E B

Е В

# Main + auxiliary frequency set

♦ When an instant power loss occurs, the VSD quarantees the

continuous operation of the production line, which meets the

continuous operation process requirement in conditions like

lightning, large power grid impact and unstable power supply

Non-stop function

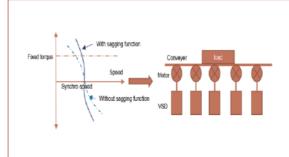

Output frequency

DC bus voltage

DC bus voltage threshold

◆ Target applications: Chemical fiber, textile

- ◆ Receives the frequency in any state, such as I/O, simple PLC, PI closed loop, multi-speed state. It uses auxiliary frequency for super precise speed.
- ◆ Target applications: Synchronization use case

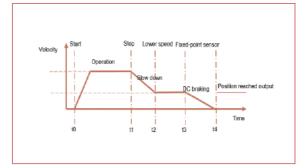

- ♦ When more than one motor drives the same load, this function can be used to adjust the speed of the motor for uniform
- $\ \, \mbox{$\blacklozenge$}$  Target applications: Tension control in chemical industry and roll control in glass and metallurgy industry

Non-stop not activated

E B

# Easy to add customized function like fixed point stop control

- Always stop at fixed point
- ♦ When there is a stop command, the motor slows down to the lower speed point, searches for a fixed stop point (usually connected to DI input by a sensor), stops at this point, and triggers an output position signal.
- ◆ Target applications: Needling machine, rotating table

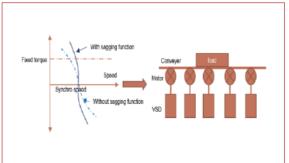

# Rich communication protocols

- ◆ Communication expansion card supports a wide range of communication protocols, making it easy to be integrated to the system and realize long-distance transmission.
- ◆ Supports functional expansion cards like I/O, PG and other customized cards.

- distribution of load.

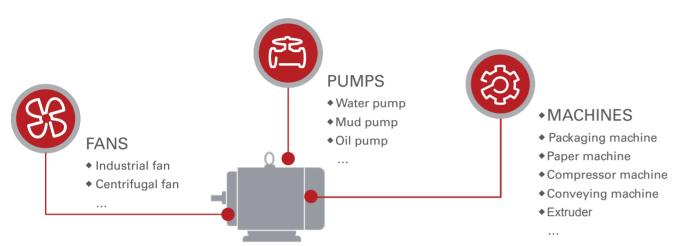

# Wherever you need an efficient motor, a variable speed drive is a must...

# **Accessories**

#### Adapted for harsh environment

**Dust-proof design:** Comprehensive anti-corrosion coating and independent air duct design. Optional dust preventing accessories can also be installed to increase overall protection capabilities against high humid or excessively dusty environments.

Target Applications: Textile machines

# **Modular Design**

**Easy fan replacement**: No need to disassemble the entire VSD for a quick fan replacement. This ease of fan change makes the VSD ideal for applications like wind machine that need regular cleaning of air ducts.

# **Accessories**

#### Great adaptability to environment

Power grid: Suitable for neutral grounded power grids.

**EMC:** Enhanced electromagnetic interference immunity against disturbances like surge, electric noise, high frequency noise and static electricity etc.

# Power grid adaptability The screw of safety capacitor

If installed in an IT system or an angular grounded TN system, remove the EMC screw to disconnect the safety capacitor in order to make it suitable for the grid system with neutral grounding.

# **EMC**

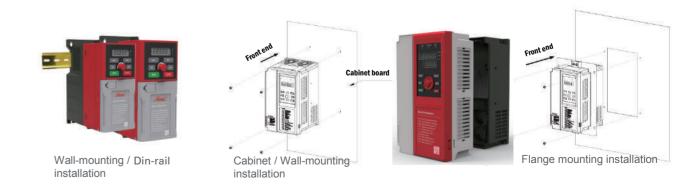

- 1. Special surge-proof design
- 2. The control board is completely isolated (COM-GND)
- 3. All inputs and outputs have optocoupler isolation.
- 4. Meets IEC61800-3 industrial standard

# Easy and comprehensive installation

# Comprehensive installation ways to fulfill all kinds of applications:

- ◆ Cabinet
- ♦ Wall-mounting
- ♦ Din rail
- ◆ Flange mounting
