

Industrial Plugs & Sockets

1. Overview

NTC1 industrial plugs, sockets and couplers with a rated current of 16A~125A are suitable for power distribution of AC 50Hz/60Hz, 415V (max.) systems, and can be widely used in various fields such as mechanical equipment, construction engineering, data centers, energy generation, mobile communication.

2. Product Features

- Excellent dust and water resistance
The product housings are rated up to IP67 and protected from total dust and water ingress, ensuring reliable operation in various severe conditions;

- Anti collision design: The product's anti collision level can reach IK07, which can prevent 2J energy impact;

- Color-coded identification of the operating voltage
The operating voltage can be identified by the appearance color of the product, which complies with the industry standards (blue:250V, red: 415V);

- Electrical-shock protection
In order to ensure the safety during use of electricity, the earthing pole of the socket is designed longer than the power pole, so that the earthing pole is always connected first when the power supply is coupled, and disconnected last when the power supply is decoupled;

Electrical Auxiliary Products

- Secure connection and reliable wiring
The unique design of the retainer makes the connection between the plug and the socket or coupler more secure;
- Equipped with a cable clamping device to prevent the cable from unintended disconnection;
- Double-bolt terminal block for more reliable connection;
- Compliance with the highest flame resistance standards
The flame resistance of the conductor contact insulation meets UL94V-0 to ensure the safety during use of electricity;

3. Main Parameters

- 3.1 Rated current: 16A, 32A, 63A, 125A
- 3.2 Rated voltage: AC250V, AC415V
- 3.3 Poles(P: live conductor; E: earthing conductor; N: neutral conductor): 2P+E, 3P+E, 3P+N+E
- 3.4 Rated insulation voltage (V): 690V
- 3.5 Protection: IP44, IP67
- 3.6 Ambient temperature range: -25~+70℃
- 3.7 Wire size: 16A: (1-4)mm²; 32A: (2.5-10)mm²; 63A: (6-25)mm²; 125A: (25-35)mm²

4.1 Model example

NNTC1-316P6H/250VW stands for a movable industrial plug with 3 poles , rated current of 16A , rated voltage of 250V and protection level of IP67.

Control Apparatus

4.2 Color coding and position of earthing terminal

We have defined different product models in the corresponding sectors of a clock, wherein the sectors marked in black refer to our standard models, and others are special models that need to be customized. The left circle table shows an overview of the clock, number of poles and voltage respectively to help you easily identify the characteristics of each product. The right two figures show a socket or connector with the PE conductor in the 6h and 9h positions respectively. This product clock diagram is based on the hole of a socket or connector to indicate the direction of the clock.

NXTC Industrial Plugs & Sockets and Couplers

1.Scope of Application

NXTC industrial plugs, sockets and couplers are designed with a rated current of 16A~125A and suitable for power distribution of AC 50Hz/60Hz, 415V (max.) systems .

Certified according to: GBT11918.1-2014, GBT11918.2-2014.

2. Product Features

- Excellent dust and water resistance
The product housings are rated up to IP67 and protected from total dust and water ingress, ensuring reliable operation in various severe conditions, and featuring excellent dust and water resistance
- Anti-impact design
The products are rated at IK07 impact resistance, and therefore able to withstand 2J impact

- Color-coded identification of the operating voltage The operating voltage can be identified by the appearance color of the product, which complies with the industry standards;

- Electrical-shock protection
In order to ensure the safety during use of electricity, the earthing pole of the socket is designed longer than the power pole, so that the earthing pole is always connected first when the power supply is coupled, and disconnected last when the power supply is decoupled;

3. Main Parameters

3.1 Rated current: 16A, 32A, 63A, 125A

3.2 Rated voltage: AC250V, AC415V

3.3 Poles (P: live conductor; E: earthing conductor; N: neutral conductor): 2P+E, 3P+E, 3P+N+E

3.4 Rated insulation voltage (V): AC800V

3.5 Protection: IP44, IP67

3.6 Ambient temperature range: -25~+70C

3.7 Flame resistance level: UL94V-0

3.8 Wire size: 16A: (1~4)mm²; 32A: (25~10)mm²; 63A: (6~25)mm²; 125A: (25~70)mm²

Motor Control and Protection

4. Model Description

Manufacturer identification code	Design series number	Industrial plug/ socket	Number of poles	Current rating	Product type	Position of earthing pole	Voltage rating	Protection
			3:2P+E 4:3P+E 5:3P+N+E	16A 32A 63A 125A	P: Movable plug AP: Panel-mounted straight plug C: Connector MXS: Connector AS: Panel-mounted straight socket	6h	AC250V AC415V	Null: IP44 W: IP67

4.1 Model example

NXTC-316P6h/250VW stands for a movable industrial plug with 3 poles, rated current of 16A, rated voltage of 250V and protection level of IP67.

4.2 Color coding and position of earthing terminal

We have defined different product models in the corresponding sectors of a clock, wherein the sectors marked in black refer to standard models, and others are special models that need to be customized. The left circle table shows an overview of the clock, number of poles and voltage respectively to help you easily identify the characteristics of each product. The right two figures show a socket or connector with the PE conductor in the 6h and 9h positions respectively. This product clock diagram is based on the hole of a socket or connector to indicate the direction of the clock.
