Battery Powered Blower UB001C PDC1200 / PDC01

UB001C

Powerful blowing force

Max 20 N*

Portable Power Pack PDC01

Battery cover protects batteries

from water and dust.

1,200Wh high capacity

Portable Power Pack

PDC1200

Height-adjustable waist belt

The position of the waist belt can be adjusted for personal fit and comfort.

Quickly removable harness

can be attached/removed from the main unit with a single action.

Reflectors

keep operator visible from a distance even in the dark.

Backpack harness

can be detached from the battery box, allowing for use as a stationary power pack.

Fuel gauge for each battery

indicates the battery status by two green lamps.

Main power switch

with auto-off function

Height-adjustable waist belt

The position of the waist belt can be adjusted for personal fit and comfort.

Powered by up to four 18V LXT

Tnakita

Less user fatigue as well as more powerful air flow

4-LED fuel gauge

(turns on with a push of

the main power switch.)

Variable speed control by trigger, -

Cruise control lever

allows you to lock the variable speed control trigger at a

desired power level.

Hole on the bottom of housing for hanging

with Cruise control lever

Best grip-to-frame angle

Stand

indicates the battery

status by four green

LEDs.

Low noise level

Smoother airflow, which is achieved by

redesigning the position of controller

while increasing blowing force.

and the air intake port, decreases noise

small change can displace the reaction force towards the handle side to minimize the return tilting action of the machine, reducing user's arm fatigue.

36V high power drive system using the Makita portable power pack

Thakita

Up to four batteries can be carried on user's back, enabling long continuous operation while providing more lightweight tool body.

3-stage telescopic long nozzle with an adjustment range of 100mm (4")

• In Boost mode, 20N max blowing force is always available.

Boost mode

• Usage time of Boost mode is restricted to protect the machine.

Available operation time in boost mode, under environment temperature of 25°C

Battery	Available operation time		
	Time per run*1	Cumulative operation time*2	
PDC1200	5 min	60 min	
PDC01 (BL1860Bx4)	5 min	17 min	

- *1 Max time per run is at least 30 seconds or longer and depends on usage environment.

bottom design for added comfort and

control in double

handed operation

WETGUARD UB001C / PDC1200 only

High water-resistance allows to operate the machine even if it is wet with water.

Nozzle is designed so that its end points downward. This
